

410 Fireground civilian rescues reported by U.S. news media or fire department press releases between January 1, 2021 and February 10th, 2021 – *Fireground Civilian Rescue Research Project*

The average demonstrates a civilian is rescued from a residential fire through the direct actions of firefighters every 2 hours and 20 minutes in the U.S.

71% 2021 civilian survival rate for firefighter rescues – *Firefighter Rescue Survey*

FIREFIGHTER
RESCUE SURVEY

From January 1, 2021 through March 31, 2021, reports of fireground civilian rescues by firefighters from news outlets, press releases and social networks will be actively collected, categorized and confirmed.

To report fireground civilian rescues or for information about the research project contact Brian Brush Brush@okstate.edu or visit www.FirefighterRescueSurvey.com
